### The Repair Process

- Once your boat arrives at our factory it will be assessed by our technicians and you will be emailed a quote on the work needed as well as an estimated completion date. Upon approval of the quote, you will need to provide a credit card number for payment.
- If you decline the repair quote, you will be charged \$50 for transportation to and from the factory and the quote time. The boat will then be returned to its original drop off location.
- When the repair work is complete your credit card will be charged and the boat will be returned to the store for pickup. You will be called to pick up your boat when it arrives back at the store.
- During the repair process, your boat will be stored outdoors on racks and will be susceptible to UV rays. We do not have indoor storage on site.
- **Once your repaired boat arrives back at the store you will have 30 days in which to pick it up, after which time we will begin charging you storage fees \*Outdoor under cover - \$50 per month, Outdoor on boat rack - \$30 per month - due at pickup.**
